

HAZEMASTER

*The most advanced
and powerful
hazer*

HazeMaster is Le Maitre's most advanced and powerful hazer yet. With a massive output capacity and rugged construction, it has been designed every step of the way for the road.

The combination of an industrial grade air-pump, a 2-stage heating process and a microprocessor controller, produce an output so powerful that the HazeMaster can convert up to 750cc of fluid per hour. Despite the huge output, the high efficiency design results in the power consumption being just 800W.

The HazeMaster has only a 3 to 4 minute pre-heat time and operation is extremely quiet. The heat exchanger has a rapid cool-down - just 2-3 minutes and is easy and inexpensive to clean or replace.

All Le Maitre hazers incorporate the patented S.T.A.R technology, which uses a two-stage low mass heat exchanger technique to produce a fine, pure and consistent haze that hangs in the air for a long period of time. The result is some of the best haze for lighting operators, providing high definition to aerial beams, adding significantly to the impact and drama of lighting and laser rigs.

FEATURES

- Tremendous output capacity down to a whisper
- Continuous output run-time
- Patented STAR technology
- High power variable fan speed
- Adjustable fan louvers for varying haze
- Fluid consumption: up to 750cc/hr (6.5 hrs/5L bottle)
- 2 channel DMX 512
- Rugged construction – designed for the road
- Rapid pre-heat time – 3 minutes
- Highly efficient – low power consumption
- Robust industrial grade air pump
- Safe for use on live stage performances
- Optional flight case
- Warranty – 12 months*
- Made in the UK

*Use of fluids other than Le Maitre will invalidate the warranty

SPECIFICATION

SIZE (mm): 230(H) x 630(W) x 450(L)

POWER: 230V; 50/60Hz; 800W

WEIGHT: 25kg

FLUID: Haze
